

MALECHAIN

FEEDER

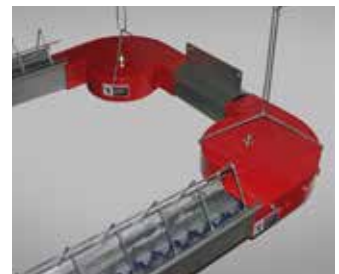

Cumberland

A large red Cumberland Malechain Feeder is the central focus, positioned in a poultry house. The feeder is surrounded by numerous white chickens. The background shows the interior of the house with metal cages and overhead infrastructure. A large red graphic element, resembling a stylized 'M' or a series of arrows, is overlaid on the image, pointing towards the feeder. A warning label is visible on the side of the feeder.

Even and low-stress **DISTRIBUTION OF FEED**

The Male Chain Feed System from Cumberland offers low-stress distribution of feed, providing roosters' with easy access to their daily ration. The heart of the system is a two-way fill hopper in the center of the house that distributes feed quickly and evenly in two directions across the entire chain line.

Two-Way Fill Hopper

Distributes feed quickly and evenly in two directions across the entire chain line

Single-Sided Open Grill

Reduces potential fighting for feed and helps ensure uniformity in roosters

Space Saving Design

28-inch centers

3/4 HP Winch

Provides high-speed raising and lowering of the feed system

90-Degree Corners

Designed for low maintenance and high performance

Quality Trough and Chain

Trough is available in 10' and 12' lengths. Cumberland's blue chain features strong link connections for reliable performance.

Programmable Control

A programmable 24-hour pin clock or a 24-hour digital clock control the feeding and fill system. Optional soft start controller is available to assist the motor's gradual increase to full speed.
